More flexible than a biscuit joint.  
Stronger than a dowel.  
Faster than both.

Automatic indexing without measuring

Ergonomic design and low weight for effortless work

Fence adjusts from 0° - 90°

Maximum joint strength with expanding glue grooves

Patented mortising allows you to work quickly and precisely

## DF 500 Q DOMINO

Joining has always been a slow, difficult process. Never again, thanks to Festool's new Domino joining system. The system consists of the Domino joiner and pre-fabricated, solid Beech, Domino tenons. The Domino joiner, with its revolutionary cutting method, simple indexing features and adjustable mortise sizing, makes flawless mortises every single time. The Domino tenon is equally as impressive – it's 100% rotation proof and far stronger than either biscuits or dowels. It also has a large gluing surface area for extra strength. Dominoes come in five sizes, one perfect for almost any application. The system works on everything from face frames and workpieces as small as 1" x 5/8", to large projects and heavy furniture. For more information on the Domino system and the entire line of Festool products, contact us or visit your local Festool dealer.
